LOCAL GRANGE FEARS COLLAPSE OF DAM FROM GRAVEL REMOVAL

Orchard City Grange, concerned with city roads and bridges being undermined by gravel operations in the vicinity of Page dam and Camden Avenue bridge, adopted a resolution at their May 27 meeting requesting city officials to protect roads and bridges by preventing the removal of gravel. Gravel operations in the Los Gatos Creek near Campbell has created great pits which during the floods of this last spring resulted in the lowering of the streambed so as to undermine the foundations of the lower Page Dam and threaten its collapse, the resolution reads in part.

The collapse of the Page Dam would result in the lowering of the streambed under the Camden Ave. bridge by approximately 30 feet, causing the destruction of the bridge, according to the resolution.

Copies of the resolution are being sent to Board of Supervisors, Campbell City Council, Board of Directors of Kiwanis Club and to the local section of the Farm Bureau, in the hope that other farm bodies and civic organizations will take action to protect county roads and bridges.

During World War I he commanded a Russian warship. He, with 6,000 other navy men, were forced to flee Russia by way of Siberia when the Bolshevist revolution came in 1919. Only 650 men of that group escaped to China. The rest were killed ni running battles with the Bolsheviks.

He came to this country with the U. S. Navy when the U. S. granted asylum to Czarists.

Kostin became a construction electrician here around 1923. He was a member of San Jose Local 322, International brotherhood of Electrical Workers.

He is survived by his widow Frieda, a daughter, Mrs. Luce, Sacramento; two stepsons, Albert F Viehwager, San Jose, and Henry P. Viehweger Campbell and eight grandchildren.

COUNCIL DISCUSSES POLICE; FIRE ORDINANCE READ; ADOPTS FUNDS ORDINANCE; ADVISES TEEN-AGERS

City Council Monday gave first reading to a city fire ordinance, adopted a city funds ordinance, discussed a proposal by Mike Kunsman for police services, filed applications for Chief of Police and advised a delegation of teen-agers on youth activities.

Fire ordinance sets up burning hours as 6 a.m. to 12 noon Tuesdays through Saturdays and 6 a.m. to 6 p.m. Sundays. The ordinance prohibits burning on Mondays.

A city funds ordinance relating to establishing and spending city funds was adopted by resolution, all councilmen registering ayes except Councilman J. B. Arends, Jr., who was absent. Reading was waived.

Homer H. Hyde, resigning chairman of the police commission of the Campbell Chamber of Commerce, spoke in behalf of Mike Kunsman, private police patrol, who ,he said, for the past eleven months had been doing the work of the city police without receiving compensation other than that provided by the merchants.

Kunsman said that he would be willing to furnish any additional service felt needed by the council if his services were recognized and if the service were paid for.

City council on suggestion of Councilman J. Frederic Snyder, agreed to fit Kunsman's proposal into the overall Campbell police situation and at the suggestion of Councilman Joseph Dahl, it was referred to the committee of public health and safety for further study.

Also filed for further consideration were written applications for the position of Campbell Chief of Police from Forrest Reese, outgoing Chamber of Commerce secretary, and Robert J. Locke, formerly with the private police patrol.

A 17-member teen-age delegation headed by Warren Edwards, 2763 Stevens Creek Road, appeared before the council concerning a youth center for the city.

Mayor Richard W. Morton suggested the delegation take their request to a civic body to see if it could be backed by donations in light of the financial condition of the city.

Kunsman, offered to act as the spokesman for the group to appear before public groups in their behalf. Councilman Joseph V. Gomes suggested bringing it before Laurance J. Hill and the board of trustees of the High school district the first Wednesday of the month at the high school office.

J. E. Hoover, spokesman for Coral Manor residents requesting action on an ungraded crossing at Rincon and Virginia avenues after hearing legal aspects of the problem from City Attorney Joseph Bonacina, and City Engineer Mark Tohmas agreed to talk over the situation with Coral Manor residents and return at a future date.

Key items of the problem discussed were city and personal liability of councilmen in event of accidents due to improper construction of traffic controls.

Councilman Snyder feared the decision would set a precedent and while there was still doubt as to the city's liability, would favor waiting until absolute legal opinion has been rendered.

Snyder also wanted to make sure that fence construction complied with State engineering specifications.

Mayor Morton agreed to talk to County Board of Supervisors concerning part payment of a fee required by Nestor Barrett, municipal planning consultant, for a master street and highway plan for the Ctiy of Campbell which the council felt was advisable if the County would bear part of the $1200 expense.

The council also:

Approved a chiropractic use permit at 211-D E. Campbell Avenue for Dr. Wayne Gregg, subject to sign, parking, and Federal Communication Commission provisions and provisions of subsequent ordinances enacted by the council.

Directed City Clerk Mrs. Viola Krug to notify Campbell Auto Wreckers to verify a request for a commercial burning permit on property at the end of Dillon Ave.

ways to be a friendly telephone neighbor

If yours is a party-line, your telephone neighbors will consider you a real friend if you'll keep these simple points in mind: Try not to tie up the line with lengthy conversations. That way you won't miss important incoming calls. Ask the youngsters to be considerate, too. When they remember that others may be waiting to use the line they're being good party-line neighbors. Always be sure you hang up properly after calling. These simple suggestions mean still better service . . . because they give every one a better chance to receive and make calls.

emergency calls may arise while you're on the line. If a telephone neighbor breaks in and explains the emergency, it's always thoughtful to hang up and complete your call later.

Monahans Home From Long Trip

Mr. and Mrs. Thomas T. Monahan, 726 Fewtrell Drive, are home from a whirlwind five-day, 2,000-mile motor vacation trip which included sightseeing visits to towns along the California coast, a junket into Tiajuana, Mexico, back up the coast and over to Nevada, with stops at Las Vegas, and Reno for a conservative though profitable fling at the wheels of fortune, followed by a restful sightseeing trip to Lake Tahoe. Would you call this the world's greatest invention ?

Perhaps not. For you recognize it instantly as the familiar container known as the tin can.

But . . . think for a moment of what it has accomplished.

It has changed the eating habits of America . . . helped raise the national health level. It has fed our armed forces all over the globe and provided them with a nutritious and a balanced diet.

It has permitted an interchange of products and a sharing of their benefits *everywhere*.

For example, Maine farmers can eat California fruits and Californians can enjoy New England baked beans. You'll find Hawaiian pineapple in Canada, peaches in Alaska, American meats in Norway, and an outstanding variety of canned foods in far-distant, little-known lands.

Through the years American Can Company, working with an alert, progressive canning industry, has pioneered hundreds of uses for this famous container—not only for food, but for such diversified products as motor oil, beer, paint, coffee and ball bearings.

The miracle of the tin can could only have happened in America . . . where a free economy offers such unlimited opportunity for a progressive, forward-looking industry to create jobs and make better products available to everyone at lower cost.

LABOR SHORT FOR CITRUS, OTHER WORKERS

Farm employment in California continues to rise rapidly toward the spring peak and the demand is increasing for all types of farm labor, Edward F. Hayes, chief of farm placement, California Department of Employment told the State Board of Agriculture Monday.

Agricultural employment at present is about two percent higher than at the same time last year, Hayes said.

Out-of-state migrants are arriving in small number, the farm placement official said. Meanwhile, reported labor shortages increased by 3,400 in the week ending May 10.

The most serious statewide shortage is for strawberry pickers. A substantial increase in acreage will require a total of more than 16,000 pickers at the last spring peak, almost 4,000 more than were needed last year. The citrus harvest is currently short about 700 pickers, and during June an additional 4,500 workers will be required.

There is heavy demand for workers in all of the vegetable areas of the state, Hayes said. In addition, cotton chopping, peach and sugar beet thinning, and harvests of cherries and apricots will require more workers.

INSECTS FOUND IMMUNE TO DDT

The sudden rapid rise in numbers of mosquitoes that have become resistant to DDT. in the last few years is under investigation by entomologists at the University of California College of Agriculture. William M. Hoskins, who has helped clear up some of the mysteries of resistance in house flies to DDT, is in charge of the work.

Insecticide resistance vastly increases public health problems. DDT, once used in mass applications for controlling mosquitoes, is now ineffective in many areas of the state.

From the work on housefly resistance, the scientists believe the mosquitoes break the DDT down into harmless products before the poison can go to work.

A complete knowledge of just how these insects handle the insecticides will also be useful in formulating new materials for control.

Gas and electricity are cheap in California!

In Richmond's new 13 acre Civic Center are the City Hall, Library, Auditorium and Hall of Justice

Take RICHMOND for example:
Typical residential gas and electric bill
In Richmond $8.76
In all U.S. cities of similar size* . . . $16.02
*Average for the 20 U.S. cities outside California between 85,000 and 100,000 population. Based on a typical use of 100 kilowatt hours and 100 therms of gas per month.

P.G. and E. home rates are far below U.S. average!

The cost of living has nearly doubled since 1940, but P. G. and E. domestic rates are actually lower than they were then! Nothing else you buy costs so little—does so much. Let P. G. and E.'s bargain gas and electricity do more of your work, bring you more of life's comforts.

MEDICAL CARE HIGHLIGHTS

"....Into whatever houses I enter I will go for the advantages of the sick...."
—Oath of Hippocrates

Hundreds of years ago, the great Greek physician and teacher, Hippocrates, Father of Medicine, wrote for his scholars the solemn oath that bears his name. On the wording of that simple creed—the full content of which you will find in any encyclopedia—is based your own doctor's code of ethics. The passing of centuries has not dulled by one whit the the stern standards imposed upon the physician by the text of the Hippocratic Oath. Today, as 2000 years ago, he is dedicated to a life of service to his fellow man.

Left to its own devices, and entirely without political influence, medical science has striven constantly to help mankind overcome his ills and handicaps. Most of the miracles of modern medicine have come about, not through government subsidy, but through private funds and free and unhampered enterprise. The results are everywhere evident. The American people of this era enjoy the highest health level . . . the finest standards of scientific medical care . . . the most modern medical institutions of learning . . . of any major country in the world. During the past 10 years, maternal mortality in America has dropped 63% . . . infant mortality has decreased 40% . . . and 6½ years have been added to the average life expectancy of adults. Such records speak for themselves.

Because it is part of the American method of doing things, Americans prefer to pay their own way — for medical service rendered, as well as for the other necessities of life. And to help them be prepared, in advance, for the financial problem of illness and surgery, doctor-groups themselves long ago originated prepaid hospital care insurance plans. More extensive protection was soon offered by insurance companies and other independent organizations. As of this year, a total of approximately 52 million Americans are now protected by some form of voluntary health insurance.

Service for all. Even so, for those unable to pay for medical attention, the physicians of this community would see that they had all needed health care without charge. If you know of anyone going without a physician's care simply because of financial reasons, please call our Medical Society office immediately. Individual medical care, regardless of ability to pay, is not a new thing. It is ancient as your doctor's Oath of Hippocrates —as centuries-old as medicine itself.

Protection for All. Any professional act believed to be contrary to public interest, or the charging of a fee believed by the patient to be excessive, should be reported in writing to the Medical Society. The services of the Society's Ethical Conduct Committee, for the unbiased review of such reports, are available to all.

Suggestions for all. Arrange while you are well to meet the costs of hospital or medical care through a voluntary health insurance plan. Enroll now in the prepaid budget plan of your own choice. **Free information folders describing voluntary plans supplied upon request.**

THE CHRYSLER NEW YORKER CONVERTIBLE
(This body style also available in Windsor DeLuxe with Spitfire Engine.)
White side-wall tires at extra cost.

ITS ENGINE ADDS MUSCLE TO EVERY DROP OF GAS!

To many owners, the mighty 180 H.P. V-8 engine that powers the Chrysler New Yorker is the most remarkable feature of this remarkable car. It is certainly the most discussed automobile engine in many, many years.

This is the engine with hemispherical combustion chambers . . . the engine that gets *more power* out of every drop of gas. And non-premium gas at that!

Actually, it puts you in control of more power than you'll probably ever need use. You'll sense this . . . together with its unequaled response . . . the very first yards you drive. It runs smoother, more quietly, and with less wear than any other engine ever built into an American automobile.

. . . and it makes driving (both cruising and the short runs) *more fun* than you have ever known it to be!

But that's not all. Along with this engine there are scores of other reasons, too, for driving a New Yorker before resolving on any new car. Like Full-time Power Steering that makes steering *five times* easier . . . and your control *five times* greater . . . than in ordinary cars. Like Power Brakes that cut needed pedal pressure by as much as two-thirds.

Like Oriflow shock absorbers that make even bad roads feel "newly paved" . . . restful chair-high seats . . . big, wide-opening doors . . . big windows that let you *see* more.

It's true . . . until you *drive* a Chrysler New Yorker you won't know what you're missing. Why not stop in today?

Artists Give Final Concert For This Season
